

Workshop 2

COLORFUL SHADOWS

EQUIPMENT LIST

- 3 flashlights (Red, Green, Blue)
- 2 triangular glass prisms
- 1 white A4 sheet of paper or large piece of white cardboard (if the wall isn't neutral)
- 1 standard white flashlight
- Various objects to cut out (animal silhouettes, hands)

INSTALLATION STEPS

- Place the white screen facing the children's area.
- Set up the three flashlights (RGB) side by side on a stand.
- Aim and cross the beams (RGB) toward the same spot on the wall to recreate white light.
- Darken the room as much as possible to saturate the colors.
- Align the two prisms to split the white light.

The Magic Prism (Wow Effect)

Turn on the classic white lamp and shine its beam through the prisms. A giant rainbow will be projected onto the wall ! This demonstrates the opposite of what we learned in the workshop : white light actually contains all the hidden colors.
